CONTACT US

TASK-1 (EASY)

NUMBER GUESSING

- Make a program in which the computer randomly chooses a number between 1 to 10, 1 to 100, or any range.
- Then give users a hint to guess the number. Every time the user guesses wrong, he gets another clue, and his score gets reduced.
- The clue can be multiples, divisible, greater or smaller, or a combination of all.

TASK-2 (MEDIUM)

YOUTUBE VIDEO DOWNLOADER

- More than a billion people watch YouTube every month.
- Sometimes there are videos we like to download permanently.
- YouTube doesn't give you that option, but you can create an app with a simple UI and the ability to download YouTube videos in different formats and video quality

TASK-3 (HARD)

MP3 MUSIC PLAYER

- The MP3 Player is a device for playing MP3s and other digital audio files. This MP3 Player GUI project idea attempts to emulate the physical MP3 Player.
- You can build software that allows you play an MP3 files on your desktop or laptop computer.
- When you are done building the MP3 Player project, users can play their MP3 files and other digital audio files without having to purchase a physical MP3 Player.
- They'll be able to play the MP3 files using their computers.

RULES & REGULATIONS

SHARE ON LINKEDIN

Make short video of each task after completion and share on LinkedIn and tag UNIcompiler

FOLLOW TIMELINE

Submit as per timeline that will be given through mail

NEW FILE

Make separate folder in github for source code

DON'T CHEAT

Dont copy source code from internet sites
